- Credit card transactions are simply and securely acquired for you
- Our fraud management and payment security system screens transactions
- View your transaction history & process refunds through our user-friendly back office
- We are a pioneer and leader in online acceptance of credit cards in African countries

### How e-Commerce credit card payments works

- Cardholder clicks to pay on the merchant's site
- Cardholder is directed to a payment page to enter credit card details
- Cardholder is then directed to a 3D Secure page
- Cardholder enters 3D Secure authentication details
- Should the cardholder not be registered for 3D Secure the card holder will be redirected to the issuing bank to register for 3D Secure
- If authentication is correct the transaction is sent for authorization
- Once authorised the merchant's website is advised of the result
